

# FD-1

## WATER FLOOD DETECTOR

The FD-1 flood detectors are designed for early detection of water leaks in spaces with water installations, such as bathroom or kitchen. Thanks to its external sensor connected with a flexible cable, the flood detector can be easily mounted even in hard-to-reach places.

### FEATURES

- detection of water flood in the areas with water installations
- easy to install external sensor

### TECHNICAL SPECIFICATION

Rated supply voltage	12 V DC (±15%)
Current consumption, standby	2,5 mA
Current consumption, maximum	4 mA
Probe wire length	3 m
Environmental class	II
Working temperature range	-10°C...+55°C
Housing dimensions	24 x 110 x 27 mm
Weight	81 g
