

GPRS/SMS REPORTING TRANSMITTER

GPRS-T1

Efficient messaging is essential for a modern security system. SATEL provides a complete range of devices intended for reliable transmission of alarm messages through variety of available media: PSTN telephone lines, ISDN networks, GSM or TCP/IP Ethernet networks.

FEATURES

- telephone line monitoring conversion to GPRS/SMS transmission, compatible with any panel
- automatic fallback to SMS reporting in case of GPRS failure
- SMS/CLIP personal messaging
- support for CLIP test transmissions
- communication failure indication

TECHNICAL SPECIFICATION

Nominal supply voltage (±15%)	12 V DC
Average current consumption (standby mode) (±10%)	50 mA
Max current consumption (±10%)	180 mA
Board dimensions (mm)	80 x 57
Environmental class	II
Operating temperature range	-10°C...+55°C

The manufacturer reserves the right to change the specification and technical data of device. The picture may vary from the real product.
