L-602 HOTEL CARD KEY SYSTEM

The key To Innovative Hotel Management

card key system is a well-designed package of product for five-star hotels. The mechanical Mortise Lock passed 3-hour fire rating test of UL standard as well as its electronics. With optional ENERGY SAVING DEVICE, the room lights and electric appliances will be operational while inserting a guest card o the device.
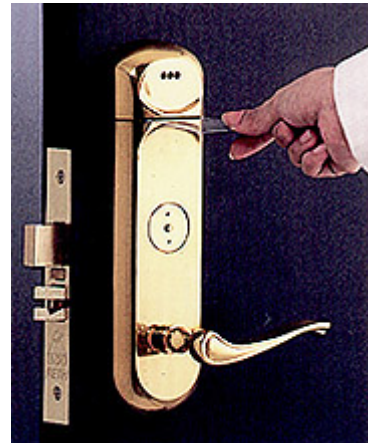

Infrared Terminal

▷ The infrared terminal will record the last 100 entry events from the lock's memory without a direct wire connection to the lock.

▷ The infrared terminal is connected to a PC or directly to a printer

Electronic Override

▷ An emergency card key, under the manager's control, will override a double-locked door in the event of an emergency.

Card Issuance System

▷ The card issuance system consists of a personal computer and a motor driven card encoder or a manual card encoder. The system uses ISO magnetic strip cards. Authorized hotel staff can only enter the card issuance system by use of a password.

▷ The encoders are specially designed so that other encoders cannot read or copy the hotel's card.

▷ The reception desk can only issue guest cards. Chief manager issues and controls all other staff cards.

Personal Computer
