

# MKP-300

เป็นกดใช้ควบคุมและสั่งงานแบบไร้สาย

Wireless keypad for MICRA system which allows arming / disarming and controlling devices connected to the module, without the need to have an own remote control key fob. This makes it an ideal control solution wherever the system is expected to be operated by many different people.

## Features:

- arming/disarming, triggering panic alarm or switching on/off devices connected to the MICRA system by means of codes
- LED s indicating the arm/disarm commands
- backlit keys for easy keypad operation in dark rooms
- a flap for protection of keys

## Application:

Control of the MICRA system in small-size buildings, such as kiosks, summer houses, boutiques, freestanding garages and workshops.
