

MPD-300

อุปกรณ์ตรวจจับความเคลื่อนไหวแบบไร้สาย

Motion detector, whose function is to detect an intruder moving within the system protected area. Owing to its pet immunity, the MPD-300 can provide protection even if small animals, such as small dogs or cats, are moving in its coverage range at the time of supervision. A lithium battery used to power the device ensures many years of work without having to replace it, so the system is as easy to use as the traditional wired solutions.

FEATURES

- digital detection algorithm with temperature compensation for high immunity to false alarms and repeatability of parameters
- ability to change sensitivity to match optimum detector parameters to the protected space
- optional operating mode with up to 15 kg pet immunity, which allows protection of areas where there are pets
- energy management system to enable many years of operation without having to replace the CR 123A lithium battery
- LED indicating violations in test mode, for easy start-up and subsequent maintenance of the system
- detection of tamper, e.g. opening enclosure, ripping away from mounting surface

APPLICATION

Protection of small-size buildings, such as kiosks, summer houses, boutiques, freestanding garages and workshops.
