

RADIO REMOTE CONTROLLERS

RE-1K

All applications that require remote control of any devices may take the benefits provided by universal remote controllers. For that purpose, SATEL offers a complete range of controllers operating at 433 MHz, which can be used to operate up to four separate channels.

Additional features provided by SATEL controllers are aimed at alarm systems functionality. In conjunction with the panel they can be used not only for arming/disarming, but also for triggering an entry delay or as a portable panic button.

FEATURES

- up to 4 separate, programmable channels
- support for up to 340 keyfobs
- operating range up to 100m open space
- remote low battery indication

TECHNICAL SPECIFICATION

Nominal supply voltage ($\pm 15\%$)	12 V DC
Max current consumption ($\pm 10\%$)	40 mA
Operating frequency band	433,05 — 434,79 MHz
Independent control channels	1
Number of supported keyfobs	16
RS-232	No
Dimensions (mm)	72 x 118 x 24
Environmental class	II
Operating temperature range	-10°C...+55°C
