

VIBRATION CONTACT

อุปกรณ์ตรวจจับการสั่นสะเทือน

ST-370

- High reliability inertia devices with wire action
- with products hermetically sealed self
- cleaning sensor. When installed they will
- respond to shock wave generated by attempted intrusion.
- Protects ceilings, walls, safes and glass
- Adjustable sensitivity, Small and inconspicuous
- Complete with mounting block and Clip-on cover
- Size : 22x59x22mm
- N/C Contact (Normally Close)
- Available in white

VIBRATION DETECTOR

อุปกรณ์ตรวจจับการสั่นสะเทือน

ST-371

- Environmental economy, high temperature resistant, corrosion resistant
- Convenience in installation
- Super environmental suitability and stability
- Sensitivity is adjustable
- Fit for wall, glass, safety box, ATM equipment, etc
- Used for alarming by sensing vibration around
- Used with vibration sensor to deal with actuated signal
- Suit for all circumstances
- Smart and elegant appearance
- Size: 85x26x25mm
- Alarm time 2.2s min
- Warm time <2minutes
