

## VC-6104

### DVR CARD เชื่อมต่อกับคอมพิวเตอร์ 4 Channel

#### Characteristic:

- MPEG4 compression format;
- occupy fewer space of the HD;
- Image resolution for display up to 25frames;
- 4 channels video input max. support single frequency of channel audio;
- Single system support 4 cards;
- 1 channels audio input, alarm input;
- continuous recording while replaying;
- 1、4、6、9、13、16 channels in image division mode;
- Multi-record ways are optional;
- Simple operation of the timetable and motion detection record.;
- Powerful network function;
- simple operation and easy to understanding;
- Support WIN98/2000/XP in English;

#### Technical Parameter:

- Video input 1~4 CHs;
- support 1~4 cards;
- Recording 1 Ch real time , 4 Ch Frame speed 1~25frames/1~30frames;
- Compression format MPEG4;
- HD occupy rate 100~200M/h/CH;
- Resolution PAL : 352×288, 768×288, 768×576;
- Recording Copy the record data to the HD;
- disk recorder and so on for long-time prepare and print the picture;
- Remote mode ISDN,DDN,PSTN,LAN,WAN,ADSL,Modem etc.,
- 256K-2M internet bandwidth able to reach the effect of LAN ;
- Alarm Mode as 16 channels alarm input;
- remotely record and monitor through local network, internet or dial up connection;
- custom programmed and record, such as: time-lapse;
- Motion Detection, alarm;
- Own the function of alarm setting;
- FTZ control Support several kinds of decode protocol;
- Control the FTZ (up,down,left,right,automatic),lens(multiple ,focus ,aperture) etc;
- Regulation FCC, CE , PC requirement - PIII 2GHz, 128MB RAM, 120GB HDD,VGA 32MB
